I'm an AI and Software Engineer with two years of experience in Python, React.js, and Next.js Web and Cross Platform App Development. Currently, I'm learning React Native Cross Platform Development and seeking a React Native Internship to further advance my expertise in the field.

EXPERIENCE

AUG 2022 – PRESENT

- **Full Stack Wallpaper Application** deployed and Integrated with Pixabay Api developed using React Native, that is compatible with both iOS and android
 - **Gemini Powered Roman Urdu AI Chatbot:** It specially designed for users who don't know English, is limited to class students' data for now.
<https://behtreen-chatbot.streamlit.app/>
 - **ChatGPT integration chatbot:** This chatbot integrated with open ai and it also has recommendation properties. <https://www.linkhomeai.com/chat/>
 - **Study Abroad Recommendation Assistant:** In my first-ever hackathon, we created a Study Abroad Recommendation Assistant using Gemini AI to help Pakistani students with personalized study opportunities abroad.
 - **EDA Web Application build with Python**, that is used for data analytics tasks and performing EDA.
